PROFILE SUMMARY

I wish to be added to an organization that might provide me a chance to reinforce my skills and permit me to figure out a way to bring me and also the company towards achieving the goals.

EDUCATION

2022-2025

MONARK UNIVERSITY

- Bachelor of Computer Application (BCA)

2021-2022

VIVEKANANDA VIDHYALAYA

- Higher Secondary Certificate

PROJECTS

VISUAL DESIGNING

2024-2025

WEBSITE

- Home & Office Interior Styling Tool
- Built a user-friendly interior designing web application using Basic Python with Django for backend processing. The front-end interface, designed with HTML, CSS, and JavaScript, allows users to style spaces efficiently with interactive visualization tools. The platform is optimized for performance and usability, ensuring seamless navigation.

SKILLS

- HTML
- CSS
- CORE JAVA
- BASIC PYTHON WITH DJANGO
- Having Good Experience various CRM software's.

WOODSITE FURNNICTURE

2024-2025

WEBSITE

- Developed a comprehensive backend system for Woodsite Furniture, an e-commerce platform supporting new, old, and rental furniture transactions. Implemented Django models to manage user roles, authentication, product categories, inventory, addresses, feedback, complaints, and order handling. The system includes full relational mapping for users, geographic data (country, state, city), and product management (brands, categories, quantity). Also enabled dynamic image handling and integrated structured models for buying and renting workflows.

LANGUAGES

- English: Read, Write
- Hindi: Read, Write, Speak
- Gujarati: Read, Write, Speak

Recipe API Project

2024 - 2025

API project

- I have worked on an API-based project using Python and Django, where I developed RESTful APIs to enable efficient data exchange. The project was designed to allow seamless integration with frontend applications or other systems.
